

Sizewell C Notice to Mariners No 11 of 2026

Construction of CDO DESAL

Mariners are advised that on or about 19th February works will commence upon the installation of three sub-seabed pipelines within Sizewell C Harbour. The works will comprise the sequential boring and lining of three tunnels –

- Combined Drainage Outfall – to discharge to sea treated wastewater from the main construction site.
- Desalination plant intake – sea water intake to desalination plant
- Desalination plant outfall – discharge of surplus sea water back to sea

Vessels engaged in these works include JUB NP497, Multicat Paul D and C-Odyssey, Workboats – C-Defender, C-Spartan, Kirkwall Bay, CTV Celtic Avenger (indicative marine plant representation below). Additional vessels may join the project as appropriate.

The construction area will be contained within SZC Marine Construction Zone as per the coordinates below and is demarcated with two yellow special marks FI Y 5s.

Latitude	Longitude
52° 12.9171' N	001° 37.4473' E
52° 13.4574' N	001° 37.5149' E
52° 13.4655' N	001° 38.2073' E
52° 12.9263' N	001° 38.2270' E

Vessels will transit frequently through the harbour to and from the MCZ and the floating swing mooring – mariners are requested to navigate with extra vigilance during these works.

Towards the end of the works the pipe pull-through operation will entail the multicat C-Odyssey lying to a four-point mooring spread close to the JUB during which time the vessel will be severely restricted in her ability to manoeuvre.

All vessels should maintain 500m exclusion zone at all times when passing the Jack-up Barge and the support vessels during diving operations. Vessels are requested to pass at the lowest speed to avoid vessel wash effects.

Mariners are requested to exercise additional vigilance and maintain an effective lookout when transiting the harbour during this period of raised marine activity. All vessels engaged in this operation will abide by and display shapes and lights required by the COLREGS. Vessels will monitor VHF Channels 12 & 16.
